OVERVIEW

USAC administers the Universal Service Fund (USF) and its four programs — High Cost, Low Income, Rural Health Care, and Schools and Libraries — under terms defined by the Telecommunications Act of 1996 as well as regulations, orders, and directives issued by the Federal Communications Commission (FCC or Commission) and its Bureaus and Offices.

Beneficiaries across the country keep connected thanks to USF support disbursed to service providers participating in one or more of these programs. These beneficiaries include Americans living in remote or rural areas, low-income consumers, rural health care providers, and public and private schools and public libraries.

The **HIGH COST PROGRAM** ensures that consumers across the country pay rates for telecommunications services that are comparable to those available in urban areas. In 2009, over 1,800 eligible carriers received High Cost Program support.

The **LOW INCOME PROGRAM** helps eligible low-income consumers establish and maintain telephone service by discounting services provided to them by local telephone companies. Over 8 million low-income households throughout the nation benefited from the program in 2009.

The **RURAL HEALTH CARE PROGRAM** provides reduced rates to rural health care providers for telecommunications and Internet services necessary

to provide health care. Almost 3,000 health care providers received support this year. The Rural Health Care Pilot Program is supporting the development of advanced networks to expand telemedicine services across the country.

The **SCHOOLS AND LIBRARIES PROGRAM**, often called the “E-rate” program, provides discounts to help schools and libraries in every U.S. state and territory secure affordable telecommunications, Internet access, basic maintenance, and internal connections. Over 21,000 eligible applicants benefited from Schools and Libraries Program support this year to bring telecommunications and Internet services to millions of students and library patrons.

The past year was one of accomplishment for USAC.

We implemented a host of advances in operations, infrastructure, and outreach in an effort to continue to improve collection and disbursement of USF support and to enhance USAC's ability to effectively and efficiently serve our many stakeholders. In a year of historic economic challenges, when USF support was more important than ever in ensuring access to the tools Americans use to keep connected, USAC disbursed more money more quickly and focused on preparing for what we anticipate will be many initiatives to come in 2010 and beyond.

USAC's operations and infrastructure sit at the core of our work administering the USF. USAC took measures in 2009 to improve efficiency and reduce our already low administrative costs. We transferred High Cost and Low Income Program operations from a contractor to USAC personnel, which will improve performance, significantly reduce costs, and better prepare USAC to respond to program changes in the future. We also transferred information technology systems for the Rural Health Care and Schools and Libraries Programs to USAC-managed facilities to facilitate development of wide-reaching systems upgrades for both programs. These upgrades will allow us to process applications and invoices more efficiently, and set the stage for new, better services for program participants.

In 2009, USAC completed fieldwork and preliminary reporting for the third and final round of the FCC Office of Inspector General (OIG) USF audit program. The final data on the first round of the program supported USAC's initial report that the early estimates of "improper" payments were too high. In the High Cost Program, the final improper payment rate dropped to 2.7% from the early estimate of 16.6%. The Schools and Libraries Program improper payment rate dropped to 8.6% from an initially reported 12.9%. USAC anticipates similar results in the final reports on the second and third rounds of the FCC OIG USF audit program.

In 2010, USAC will transition to a new approach, analyzing data from beneficiaries and from USAC to measure rates of improper payments and using a broad audit program to measure program compliance. This new approach will

USAC's operations are complex—we issued over 55,000 USF contributor invoices, made over 78,000 disbursements to applicants and service providers, and handled over 120,000 customer calls.

reduce costs for USAC and program participants, generate more accurate data, and enhance program integrity by broadening coverage to all four universal service programs as well as USF contributors.

USAC continues to expand outreach activities to provide more help for more program participants in more ways. In 2009, we continued expanding our new media services, offering a series of webinars and producing numerous online learning videos, all targeting key areas of program requirements. We enhanced both our group training sessions and one-on-one outreach, reaching over 3,000 people face-to-face with more interactive support focused on the problems program beneficiaries experience getting USF support. We will keep working on ways to improve customer service and welcome any suggestions on how to do so.

All of these activities are possible only because of USAC's highly skilled professional staff. USAC's operations are complex – we issued over 55,000 USF contributor invoices, made over 78,000 disbursements to applicants and service providers, and handled over 120,000 customer calls. As our responsibilities and activities expanded in 2009, we enjoyed a low turnover rate and quickly brought new employees up to speed in providing help with our IT, outreach, and audit tasks.

As the new administration took office, USAC worked to establish strong working relationships with Acting FCC Chairman Copps and then with Chairman Genachowski and their teams. We want to thank the Commission and its staff for helping us to move forward in a year of transition. Support from the Commission, the expertise of our Board, and the professionalism of our staff enabled us to rise to the changes and challenges of 2009. We will carry these strengths forward into 2010 and stand ready to assist Congress and the Commission in implementing what we anticipate will be significant changes to the USF and its programs.

D. Scott Barash
Acting Chief Executive Officer

USAC performs a large number of complex tasks every day to collect and disburse USF monies, ensure fund integrity, oversee program accountability, and communicate with stakeholders.

From collecting and validating telecommunications revenue for contributor invoices to calculating and disbursing support payments for each of the four USF programs, USAC must ensure that its operations are accurate and efficient.

USAC issued over 55,000 USF contributor invoices, made over 78,000 disbursements to applicants and service providers, and handled over 120,000 customer calls in 2009. Managing this volume of work requires coordination with the four USF program staffs and program participants to get the precise data needed to make accurate support payments. USAC performs its complex functions cost-effectively — USAC's administrative costs are well below nearly all comparable federal and state agencies as well as non-governmental organizations.

USAC strives for continuous improvement in its operations. In 2009, USAC upgraded the information technology (IT) behind its disbursement systems and implemented additional internal controls to better manage USF collection and disbursement processes. USAC also moved its data centers from an outside vendor to USAC-managed hosting facilities to reduce operating costs and enable USAC to be more responsive to changing business needs.

USAC successfully launched a revised FCC Form 498 in November as part of an ongoing effort with the FCC to make all USF payments by electronic funds transfer. USAC worked closely with the FCC on recommended changes to the form, including adding the collection of study area codes, Dun & Bradstreet numbers, and electronic banking information as well as requiring officer certification on all form revisions. This effort also will improve the accuracy and efficiency of electronic payments through automation.

In 2009, USAC prepared its first assessment of internal controls consistent with Office of Management and Budget requirements. No material weaknesses were identified, and USAC worked diligently to remediate the issues that did arise and increased staff to ensure full performance of all internal control activities.

USAC launched several outreach initiatives in 2009 to remind USF contributors of upcoming quarterly and annual filing deadlines and to inform recipients of USF support of new FCC requirements for providing data. This work included emails to stakeholders, timely updates to USAC's website, and outreach from USAC's customer service staff.

2009 Service Provider Participation

NOTE

As of December 31, 2009.

* Based on receipt of invoice payment in 2009.

Program	Service Providers
High Cost	1,865 eligible telecommunications carriers
Low Income	1,901 eligible telecommunications carriers
Rural Health Care	544 service providers* (telecom and Internet access)
Schools and Libraries	3,878 service and equipment providers*

2009 Average Monthly Invoices by Primary Carrier Type

Unaudited

Total 4,637 Invoices Per Month

USF Contributions Year in Review – In 2009, the USAC Finance Billing Team processed 100% of the approximately 55,000 contributor invoices on time. The chart depicts the approximate 2009 breakdown of monthly invoices by carrier type.

HIGH COST PROGRAM

The High Cost Program ensures that consumers across America have access to affordable telecommunications services. USAC is responsible for data collection and maintenance, support calculations, and disbursements for the five components of High Cost Program support.

In 2009, USAC started and completed a project to bring in-house all High Cost and Low Income Program administrative operations, from data intake to support payments. This in-sourcing effort involved building out hardware infrastructure, deploying enhanced software, conducting extensive testing, and large-scale knowledge transfer from the incumbent vendor to USAC staff.

It also involved transitioning customer service and data entry operations to USAC employees as well as developing a workflow management tool and document repository for information submitted by program participants. The transition was completed in December 2009 on time and under budget. Direct control of program operations will save millions of dollars in contractor expenses, increase efficiency and accuracy of calculations, improve customer service, and allow for better data reporting on program performance metrics.

Alongside the High Cost in-sourcing work, USAC conducted increased training and outreach activities. Training sessions took place in Atlanta, Indianapolis, and Minneapolis, drawing about 150 attendees. Program staff, in conjunction with USAC audit staff, conducted a series of webinars on audit processes and record retention recommendations.

USAC also held a webinar on the online FCC Form 525 that is used by competitive carriers to file line count data. USAC sent program welcome packets to over 300 eligible telecommunications carriers.

A change to High Cost disbursements came from putting into place Interim Support Cap payments to competitive carriers. The FCC mandated the interim cap in 2008. USAC staff implemented the new rule in 2008 and continued to make the required systems changes to accommodate new data and to ensure accurate calculations in 2009. Staff also implemented two FCC orders relating to the cap for Alaska native regions and tribal lands.

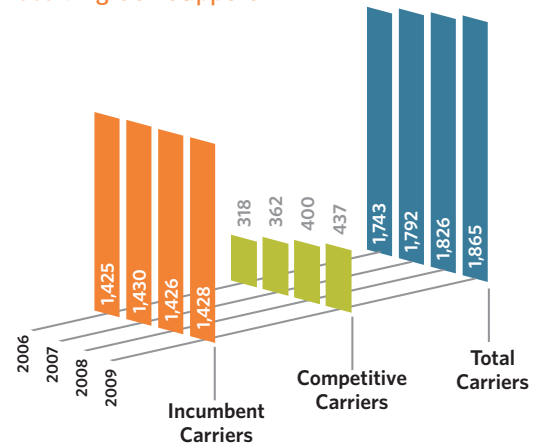

USAC completed the third and final round of the FCC Office of Inspector General (OIG) USF audit program, which consisted of over 770 audits of High Cost Program beneficiaries designed to assess program compliance and estimate improper payment rates. Follow-up work for round one audits conducted after the FCC OIG issued its initial statistical analysis in 2007 demonstrated that the estimated improper payment rate in the High Cost Program was 2.7% and not 16.6% as initially reported by the FCC OIG.

Disbursements by Year

Chart represents unaudited disbursements by Calendar Year, as of December 31, 2009.

Incumbents and Competitors Receiving USF Support

2009 Study Areas by Category

* Competitor count reflects some CETCs that serve in both Rural and Non-Rural Study Areas and are counted separately in each category.

	Incumbent Study Areas						
	Rate-of-Return			Price Cap	Total Incumbent	Competitive Study Areas*	Total Study Areas
	Cost Companies	Average Schedule	Total				
RURAL	724	438	1,162	191	1,353	299	1,652
NON-RURAL	1	1	2	83	85	270	355
TOTAL	725	439	1,164	274	1,438	569	2,007

LOW INCOME PROGRAM

The Low Income Program ensures that low-income consumers can initiate and maintain telecommunications services at affordable rates. The three components of the program are Lifeline, Link Up, and Toll Limitation Service (TLS).

Lifeline reduces eligible consumers' monthly charges for basic telephone service. Link Up reduces the cost of initiating new telephone service. TLS support allows eligible consumers to subscribe to toll blocking or toll control at no cost.

Low Income Program staff spent a large part of 2009 bringing program operations and administration in-house, which will reduce operating costs while increasing efficiency. Program staff successfully built out the necessary hardware and software environments for data intake, support calculations, and disbursement validations. During this process, significant knowledge about carrier administration, preparation of Low Income appendices, FCC Form 497 data collection, and the requisite steps for generating projection calculations and disbursements was transferred in-house.

Transferring Low Income Program operations in-house allowed USAC's Customer Operations Team to assume data entry responsibility from the vendor for the approximately 2,200 forms submitted by participating carriers in November 2009, with no significant impact to USAC operations or the customer experience.

Enhancements to program IT capacities included the August launch of the online FCC Form 497, the main form used by USAC to collect carrier data and calculate support. The online form is more efficient for large carriers, has built-in validations to reduce errors, and allows carriers to bulk upload and bulk certify multiple forms. USAC added both application development and system engineering teams to provide production support and to enable future system enhancements for the High Cost and Low Income Programs.

As part of its expanded outreach efforts, and in support of the launch of the online FCC Form 497, Low Income Program staff conducted five webinars, drawing approximately 500 participants. These webinars focused on how to set up users for online access, file individual forms, and use the bulk upload and bulk certify features. Staff also held two audit-related webinars and participated on panels at several professional meetings, all part of a broader effort to present program information in as many ways to as many people as possible.

Disbursements by Year

Chart represents unaudited disbursements by Calendar Year, as of December 31, 2009.

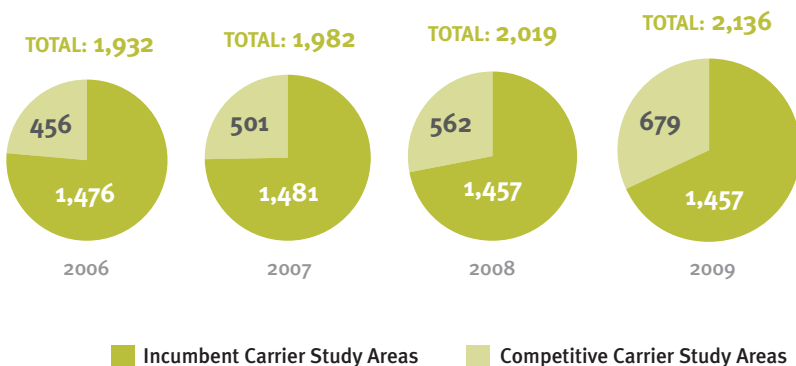

Number of Connections Supported

Number of Connections Supported for the previous quarter is provided due to the Low Income FCC Form 497 filing process (e.g., the 2Q2009 total is for 1Q2009).

Number of Connections Supported	Quarter
6,660,294	3Q2008
6,644,632	4Q2008
7,021,381	1Q2009
7,706,716	2Q2009
8,488,407	3Q2009

Study Areas Receiving Support

Based on USAC quarterly FCC projection filings.

RURAL HEALTH CARE PROGRAM

The Rural Health Care Program ensures that eligible rural health care providers (HCPs) can obtain telecommunications and Internet services used in the provision of healthcare at rates comparable to their urban counterparts. The program supports HCPs' efforts to use electronic communications for health care, increasing access to vital health care and public health services in rural areas.

In 2009, the program reached record-high participation rates for Funding Year 2008 (FY2008). Nearly 3,000 HCPs submitted a record 3,661 application forms describing the services being sought. Once HCPs finished their competitive bidding processes for these services, they filed nearly 7,300 funding requests for the eligible services. This is a four-percent increase in the number of HCPs requesting support over FY2007 and an almost 13% increase in the number of services requested over FY2007. As of December 31, 2009, 3,520 HCPs had submitted applications for FY2009. Of these, 41% are rural health clinics, 31% are hospitals, 11% are local health departments, eight percent are community health centers, eight percent are community mental health centers, and one percent are post-secondary health care educational institutions.

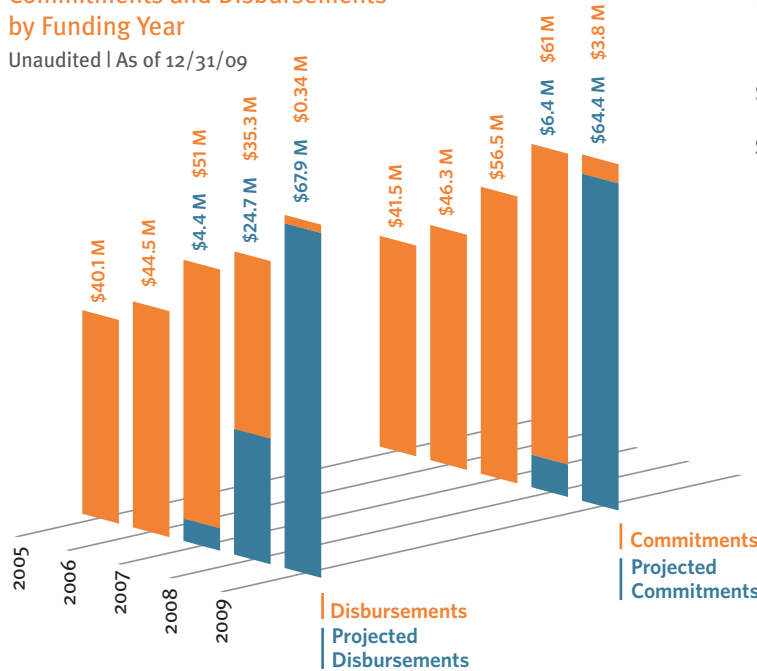

In addition to the primary program, USAC continued administering the FCC's Rural Health Care Pilot Program, which dedicated \$418 million for the construction of 62 statewide or regional broadband telehealth networks in 42 states and three U.S. territories. During 2009, USAC posted 41 requests for proposals from 31 pilot projects, issued 53 funding commitments to 17 projects totaling \$28.9 million, and disbursed more than \$11.5 million.

To manage the increase in applications and disbursements, USAC worked to enhance its information technology (IT) systems and to expand its outreach to program participants. Rural Health Care Program staff worked closely with USAC IT staff to implement a number of system enhancements to increase automation and operational efficiency.

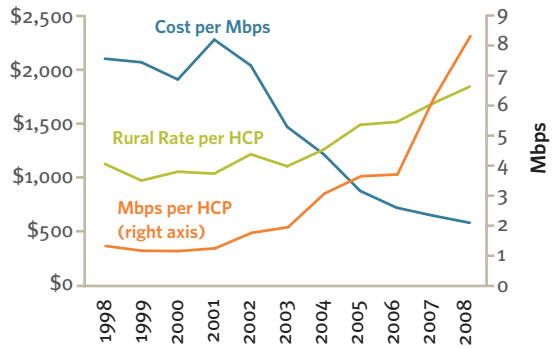

USAC outreach efforts served to educate HCPs about the application process required to receive funding. USAC conducted monthly conference calls for applicants and service providers, focusing on new program rules, forms and procedures, opening of a new funding year, and administrative changes to the application process. An August webinar titled, "Understanding the Application Process," explained how to complete required FCC forms to more than 100 new applicants. USAC directed targeted outreach to HCPs by developing welcome packets for new applicants, automating due date reminders and individual HCP status emails for current applicants, and by reaching out to prior applicants. Rural Health Care staff also presented and staffed booths at national healthcare or telehealth conferences.

Number of HCPs

SCHOOLS AND LIBRARIES PROGRAM

The Schools and Libraries Program (often called E-rate) helps to ensure that schools and libraries can obtain telecommunications, Internet access, basic maintenance, and internal connections at affordable rates. Program discounts for support depend on the level of poverty and the urban/rural status of the population served, ranging from 20% to 90% of the costs of eligible products and services.

During the past year USAC focused on many internal and external efforts to better serve applicants and service providers. For example, after months of planning, in September, USAC upgraded the program's IT systems over a two-week period that involved a cutover of the supporting infrastructure from a contractor's data center in New Jersey to a USAC data center. The infrastructure upgrade will enable USAC to bring new features to applicants and service providers in the near future.

In 2009, USAC staff focused on helping applicants successfully complete program forms and requirements using various outreach methods including training sessions, online video tutorials, and the Helping Applicants to Succeed (HATS) visits.

USAC staff held eight one-day training sessions for applicants and two for service providers. Offered across the country, these sessions attracted approximately 1,600 attendees. Applicant sessions featured three tracks, one for beginners, one for advanced participants, and one offering specialized sessions on complex topics. Service provider training offered special guidance on how to comply with program rules. Program staff created and posted six video tutorials covering general information about the program, how to fill out program forms, and how to get help using the website and other tools. In 2009,

these tutorials received over 4,000 views, and in 2010 USAC expects to post more tutorials on topics important to stakeholders.

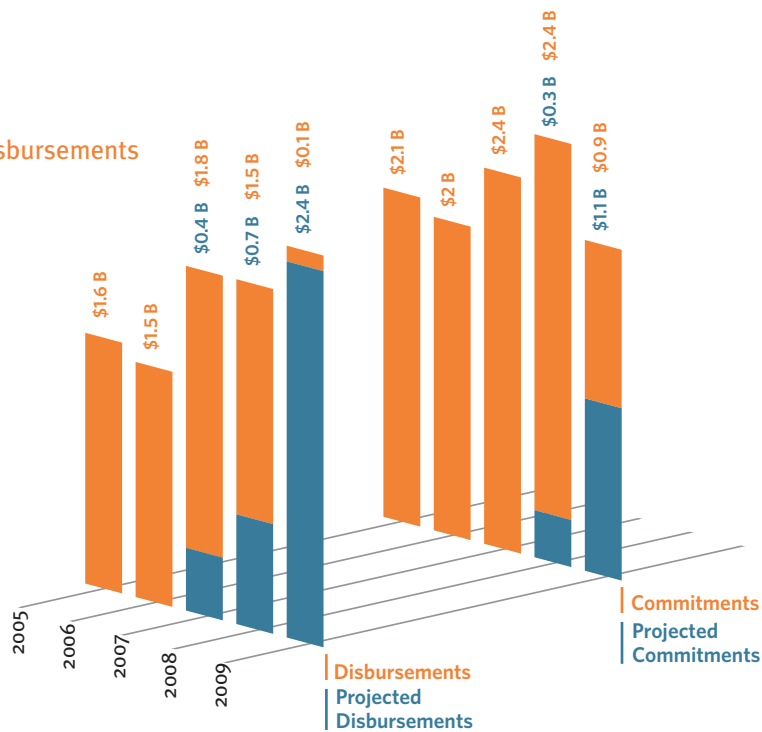

In 2009, the HATS program staff conducted over 125 visits to applicants identified as needing additional help to file a successful application. HATS visits can occur in person, by video conference, or by telephone. This outreach came on top of over 250 telephone calls to remind applicants to file their forms on time.

Increased outreach efforts have resulted in greater compliance with program rules, faster funding decisions to more applicants, and faster processing of invoices. In fact, 2009 saw USAC issue the second-earliest initial wave of funding commitments in program history.

USAC completed the second round and substantially completed the third and final round of the FCC Office of Inspector General (OIG) USF audit program, which consisted of over 600 audits of Schools and Libraries Program beneficiaries to assess program compliance and estimate improper payment rates. Follow-up work for round one audits conducted after the FCC OIG issued its initial statistical analysis in 2007 demonstrated that the estimated improper payment rate in the Schools and Libraries Program dropped from 12.9% to 8.6%, 33% lower than initially reported.

MANAGEMENT'S DISCUSSION & ANALYSIS

MISSION AND STRUCTURE

The Universal Service Administrative Company (USAC) is an independent, not-for-profit corporation that was created in 1997 to administer the Universal Service Fund (USF). USAC's mission is to collect and distribute USF funds and administer the four universal service support mechanisms – High Cost, Low Income, Rural Health Care, and Schools and Libraries – in accordance with Federal Communications Commission (FCC) rules. USAC does not set or advocate policy. USAC works to protect the integrity of the USF, promote compliance among program participants, and provide information about the USF to Congress, the FCC, program audiences, and the general public. In all these tasks, USAC strives to provide efficient, responsible stewardship of the USF, a key national

asset in making important telecommunications services available to consumers, health care providers, schools, and libraries throughout the United States.

FCC regulations governing USAC are found in Part 54 of Title 47 of the Code of Federal Regulations (47 C.F.R. Part 54). These regulations required USAC to establish three program divisions: High Cost and Low Income, Rural Health Care, and Schools and Libraries. The program divisions are supported by additional USAC personnel in External Relations, Finance, General Counsel, Human Resources and Operations, Information Systems, and Internal Audit.

PERFORMANCE MEASURES

USAC is required to report quarterly to the FCC on performance measures pursuant to a Memorandum of Understanding signed in September 2008. This information pertains to USAC's administration of the USF and the four USF programs. Below is a selection of performance measures for 2009.

FUND ADMINISTRATION	1ST QTR	2ND QTR	3RD QTR	4TH QTR
USF CONTRIBUTOR STATISTICS				
Number of USF contributors	2,882	2,944	2,912	2,867
*Number of delinquent contributors	1,852	1,676	1,493	1,461
**Contributors assessed late fees or penalties	1,175	1,125	1,491	1,281
AVERAGE TIME TO PROCESS PAYMENTS (DAYS)				
High Cost	3	6	5	4
Low Income	29	29	29	29
Rural Health Care (Funding Year 2008)	11	14	12	12
Schools and Libraries (Funding Year 2008)	5.5	6	5.5	11

SYSTEMS, CONTROLS, AND LEGAL COMPLIANCE

In 2008, USAC implemented a formalized internal control structure and review process consistent with the guidance in Office of Management and Budget (OMB) Circular A-123 titled "Management's Responsibility for Internal Control," including Appendix A (Implementation Plans). In 2009, to enhance USAC's overall internal control framework, USAC expanded the staffing responsible for documenting and testing internal controls throughout the company. No material weaknesses were identified during the 2008 or the 2009 internal control assessments. In addition to management's annual internal control assessments, USAC contracts with an independent audit firm to perform an annual audit of its financial statements as well as agreed-upon procedures in compliance with the requirements in 47 C.F.R. Part 54. The FCC's auditors also audit the USF as part of the annual FCC financial audit.

USAC's current financial management system is a widely used and commercially accepted accounting system. The 2009 audit of the FCC's financial statements determined that the Federal Managers Financial Integrity Act of 1982 applies to the FCC's reporting components (e.g., USAC as the administrator of the USF) and that USAC's financial systems do not achieve the federal financial system integration standards as determined by OMB. Although USAC's financial systems are not currently compliant with OMB standards, USAC has compensating controls in place to ensure all financial data is accurate and meets the requirements of the FCC. We are actively working with the FCC to finalize a request for proposals to obtain and implement a fully compliant financial management system.

FUTURE EFFECTS

Please see the Notes to the Independent Auditors Report beginning on page 25 for a full discussion of currently known demands, risks, and conditions related to USAC and the USF.

FINANCIAL INFORMATION

The accompanying USAC unaudited financial statements and tables are the responsibility of USAC management and reflect all necessary adjustments and reclassifications that are necessary for fair presentation of the period presented. The results for the year ended December 31, 2009 are not considered final until the 2009 financial statements audit is completed by our independent auditors. These unaudited financial statements and tables should be used in conjunction with the audited financial statements and the notes thereto for the years ended December 31, 2008 and 2007, included herein.

The table on the right presents selected data about USAC's staffing and operations for 2009 and 2008.

ITEM	2009	2008
Number of employees	243	194
Personnel costs	\$ 24,016,000	\$ 21,196,000
Overall general and administrative expenses	\$ 107,785,000	\$ 99,832,000
Contract expenses	\$ 50,699,000	\$ 48,507,000

Note: Table excludes depreciation, amortization, and loss on retirements.

The staffing increase over the past year was driven by increases in information technology and support mechanism personnel, due in large part to the in-sourcing of the High Cost and Low Income support mechanisms from an outside vendor. Accordingly, personnel costs, which include wages, employee benefits, and corporate payroll taxes, increased over the past year as well.

Overall general and administrative expenses increased because of costs associated with implementing the large-scale FCC Office of Inspector General USF audit program.

Contract expense increases were a result of higher costs related to systems analysis, routine upgrades, and database administration over the past year.

2009 USAC CONTRACTORS

CONTRACTOR/VENDOR	TYPE OF GOODS/SERVICES	PROCUREMENT METHOD
SOLIX, INC.	RHC-SL Operational Support Services	Competitive bid

Report of Independent Auditors

To the Board of Directors of Universal Service Administrative Company:

In our opinion, the accompanying statements of financial position and the related statements of operations and change in unrestricted net assets and of cash flows present fairly, in all material respects, the financial position of Universal Service Administrative Company (the "Company") at December 31, 2008 and December 31, 2007, and the change in its net assets and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in the Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In accordance with Government Auditing Standards, we have also issued our report dated June 15, 2009 on our consideration of the Company's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters for the year ended December 31, 2008. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards and should be considered in assessing the results of our audit.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The additional supplemental schedules listed in the table of contents are presented for the purposes of additional analysis and are not a required part of the basic financial statements. These schedules are the responsibility of the Company's management. Such schedules have not been subjected to the auditing procedures applied in our audit of the basic financial statements and, accordingly, we express no opinion on them.

A handwritten signature in black ink that reads "PricewaterhouseCoopers" in a cursive script.

The accompanying notes are an integral part of these financial statements.

NOTES TO FINANCIAL STATEMENTS As of and for the Years Ended December 31, 2008 and 2007**1. ORGANIZATION AND BASIS OF PRESENTATION**

The Universal Service Administrative Company (“USAC” or the “Company”) was incorporated, effective September 17, 1997, as a not-for-profit, independent, wholly-owned subsidiary of the National Exchange Carrier Association, Inc. (“NECA”), and appointed by the Federal Communications Commission (“FCC”) to administer the Universal Service Fund (“USF”) and the universal service support mechanisms. USAC’s Board of Directors consists of independent directors representing a cross-section of stakeholders in the USF and the universal service support mechanisms. The financial statements of the Universal Service Administrative Company have been prepared on the accrual basis of accounting.

The accompanying financial statements have been prepared on the accrual basis of accounting, in conformity with the accounting principles generally accepted in the United States of America. USAC follows the accounting and reporting requirements as set forth in the American Institute of Certified Public Accountants’ (“AICPA”) *Audit and Accounting Guide for Not-for-Profit Organizations*. The FCC, in its Report and Order in CC Docket Nos. 96-45 and 97-21 (“Universal Service Order”) released May 8, 1997 and November 20, 1998, respectively, determined that USAC should serve as the permanent administrator of the High Cost, Low Income, Rural Health Care, and Schools and Libraries Universal Service Support Mechanisms, collectively referred to herein as the “Programs,” established pursuant to Section 254 of the Communications Act of 1934, as amended.

USAC, as the administrator of the USF, performs billing, collection, and disbursement functions for the USF and the Programs. It also collects information regarding contributing entities’ and end-user telecommunications revenues, and submits projections of demand, administrative expenses for the Programs, and quarterly universal service contribution data to the FCC.

The functions of USAC as the administrator of the USF also include, but are not limited to, development of applications and associated instructions as needed for the Programs, administering the application process to ensure compliance with FCC rules and related operational infrastructure for such processes, creating and maintaining a Web site, performing outreach and public education functions, authorizing audits of telecommunication carriers, schools, libraries, and rural health care providers, and development and implementation of other functions unique to the Programs.

NECA performs data collection functions for the High Cost Program pursuant to FCC rules and bills USAC for the associated costs. NECA is compensated by USAC in accordance with NECA’s Cost Accounting and Procedures Manual. NECA Services, Inc. (“NECA Services”) performs services for the Schools and Libraries and Rural Health Care Support Programs. Effective November 14, 2005, the name of NECA Services was changed to Solix, Inc. (“Solix”). For the years ended December 31, 2008 and 2007, the expense recognized for services rendered by NECA were \$568,948 and \$539,550, respectively, and for the same periods, the expense recognized for services rendered by Solix were \$42.5 million and \$43.9 million, respectively. These expenses are included in the contractual expenses in the accompanying Statements of Operations and Changes in Unrestricted Net Assets. At December 31, 2008 and 2007, there were no amounts due to Solix related to these services.

Funds collected from contributors to the USF by USAC are restricted as to their intended use related to the Programs discussed above. The cash and other financial assets of the USF which USAC administers and acts as an intermediary for, are reported at fair value in the Statements of Financial Position as assets held for the Federal USF, with an equal amount recorded as liabilities related to assets held for the Federal USF in accordance with Statement of Financial Accounting Standards (“SFAS”) No. 136, *Transfers of Assets to a Not-for-Profit Organization or Charitable Trust That Raises or Holds Contributions for Others* (“SFAS No. 136”). In accordance with SFAS No. 136, activities related to the USF are not presented in USAC’s Statements of Operations and Change in Unrestricted Net Assets and Statements of Cash Flows.

2. NEW ACCOUNTING PRONOUNCEMENTS

In September 2006, the Financial Accounting Standards Board (“FASB”) issued SFAS No. 157, *Fair Value Measurements*, which defines fair value, establishes a framework for consistently measuring fair value under generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS No. 157 is effective for the Company beginning January 1, 2008. USAC has determined that current disclosures and processes are in compliance with SFAS No. 157.

3. SIGNIFICANT ACCOUNTING POLICIES

USE OF ESTIMATES—The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and

liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

FIXED ASSETS—Fixed assets consist of furniture, equipment, leasehold improvements, computer hardware and software. These assets are carried at cost, net of accumulated depreciation. Depreciation of furniture and equipment is calculated on a straight-line basis over the five- to seven-year estimated useful lives of those assets. Amortization of leasehold improvements is calculated on a straight-line basis over the shorter of the remaining period of the respective leases or estimated useful lives of the improvements. Depreciation and amortization of hardware and software is calculated on a straight-line basis over the three-year estimated useful lives of those assets. Maintenance and repairs are expensed to operations as incurred.

IMPAIRMENT OF LONG-LIVED ASSETS—The Company evaluates long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying value of an asset may no longer be recoverable. If the estimated future cash flows (undiscounted and without interest charges) from the use of an asset were less than the carrying value, a write-down would be recorded to reduce the related asset to its estimated fair value.

PAYABLE TO THE FEDERAL USF—Payable to the Federal USF presented in the Company's Statements of Financial Position consists of amounts provided to USAC by the USF for USAC operations and held in USAC cash in excess of accounts payable and accrued expenses.

CONTRACT REVENUE—USAC, as the administrator of the USF, recognizes contract revenue when services are rendered. Contract

revenues are equal to the cost of providing administrative support to the USF and the Programs, and to other FCC fund administrators. Such costs are paid by USF and the other FCC fund administrators to USAC. These transactions are considered exchange transactions in accordance with the American Institute of Certified Public Accountants' ("AICPA") *Audit and Accounting Guide for Not-for-Profit Organizations*. The other FCC fund administrators include Telecommunications Relay Services ("TRS"), North American Numbering Plan ("NANP"), and Local Number Portability ("LNP"). USAC invoices these administrators for direct and indirect charges it incurs each month for the data collection and management functions on their behalf.

CONCENTRATION OF CREDIT RISK—Financial instruments that potentially subject USAC, as the administrator of the USF, to concentration of credit risk consist principally of cash, cash equivalents, short-term and long-term investments, and receivables from contributors. USAC, as the administrator of the USF, places its cash, cash equivalents, and short-term and long-term investments with high-credit quality institutions and limits the amount of credit exposure from any one institution. USAC maintains its cash and cash equivalents with financial institutions which are federally insured under the Federal Depository Insurance Corporation Act (FDIC). The total deposits at these institutions are generally in excess of the federally insured amount of \$100,000. USAC has not experienced any losses on its cash and cash equivalents. USAC also has invested USF excess cash in tax-exempt securities that are classified under Assets held for the Federal USF.

CASH AND CASH EQUIVALENTS—USAC, as the administrator of the USF, considers all highly liquid securities with an original maturity of three months or less as of the financial statement date to be cash equivalents.

		December 31	
	<i>(in thousands)</i>	2008	2007
4. FIXED ASSETS			
Fixed Assets as of December 31, 2008 and 2007 are as follows:	FIXED ASSETS		
	Office furniture	\$ 1,920	\$ 1,913
	Office equipment	451	451
	Computer hardware	2,518	2,381
	Computer software	7,624	4,991
	Leasehold improvements	558	558
	Projects in progress	9,339	2,073
	Total Fixed Assets	22,410	12,367
	Less accumulated depreciation & amortization	(8,041)	(5,437)
	NET FIXED ASSETS	\$ 14,369	\$ 6,930
<i>Depreciation and amortization expense was \$2,682,758 and \$2,190,622 for the years ended December 31, 2008 and 2007, respectively.</i>			

5. ASSETS AND LIABILITIES RELATED TO ASSETS HELD FOR THE FEDERAL USF

In connection with USAC's administration of the Programs, USAC collects monies from and makes disbursements to telecommunications and service providers, as required by FCC rules, orders, and directives. As discussed in Note 1, the cash and other financial assets of the USF, which USAC administers and acts as an intermediary for, are reported at fair value in the Statements of Financial Position as assets held for the Federal USF, with an equal amount recorded as liabilities related to assets held for the Federal USF. The summary of assets applicable to the USF included below provides additional detail with respect to these amounts.

	December 31	
<i>(in thousands)</i>	2008	2007
Cash and cash equivalents	\$ 53,410	\$ 87,271

Interest receivable	3,609	8,023
TOTAL ASSETS HELD FOR THE FEDERAL USF	\$ 6,321,410	\$ 5,725,929

SHORT-TERM INVESTMENTS—USAC, as the administrator of the USF, considers all securities purchased with an original maturity of greater than three months and a current maturity of less than or equal to one year to be short-term investments. Short-term investments consist solely of United States Treasury securities with readily determinable fair values. USAC, as the administrator of the USF, accounts for its investments in accordance with SFAS No. 124, Accounting for Certain Investments Held by Not-for-Profit Organizations and also accounts for investments at fair market value in accordance with SFAS No. 157, Fair Value Measurements. At December 31, 2008, there were \$5.50 billion in short-term investments. There were \$4.92 billion in short-term investments at December 31, 2007.

LONG-TERM INVESTMENTS—USAC, as the administrator of the USF, considers all securities purchased with a current maturity of greater than one year to be long-term investments. These investments are accounted for in accordance with SFAS No. 157. Long-term investments consist primarily of United States Treasury debt securities with readily determinable fair values. At December 31, 2008 and 2007, the USF had \$25.4 million and \$0 of long-term investments, respectively.

ACCOUNTS RECEIVABLE AND ALLOWANCE FOR DOUBTFUL ACCOUNTS

USAC, as the administrator of the USF, recognizes accounts receivable arising from amounts billed to contributors and the recovery of funds from service providers and beneficiaries, which remain unpaid. Accounts receivable are recorded at invoiced amounts and generally do not bear interest. Based on the Debt Collection Improvement Act ("DCIA"), all receivables over 90-days delinquent are transferred to the FCC for collection, except for receivables where the debtor has appealed the validity of the amount owed or the debtor has sought protection under Chapter 7 or 11 of the United States Bankruptcy Code. The DCIA receivable balances transferred to the FCC remain as USF receivables. All receipts of DCIA transferred receivables are the property of the USF and, if collected, are transferred to the USF by the FCC.

In 2008, USAC, in compliance with FCC Order 07-150, adopted August 22, 2007, initiated the process of assessing interest and penalties on all receivables over 30 days delinquent and receivables transferred to the FCC for collection.

Gross receivables are reduced to net realizable value by the allowance for doubtful accounts, which reflects the Company's estimate of exposure to risk of nonpayment of billed balances, determined principally on the basis of its collection experience. The allowance includes reserves for identified bankruptcies, identified inactive contributors, delinquent amounts that are referred to the FCC for enforcement, and other items. Management periodically reviews such estimates and management's assessment of recoverability may change based on actual results.

Accounts receivable write-offs are submitted by the Collections Manager to the FCC each quarter. Generally, each account has been outstanding more than five years prior to write-off consideration. USF write-off policy is determined based on the FCC Policies and Procedures Manual, Chapter 4: Accounts Receivable and Revenues, Section 360: Cancellation, Termination, Write-off and Close-out Policy of Delinquent Debt. The Commission's authority to write-off is set forth in 31 U.S.C. § 3711, and 31 C.F.R. Parts 902-904, Federal Claims Collection Standards (FCCS).

6. FAIR VALUE OF FINANCIAL INSTRUMENTS INCOME TAXES

Statement of Financial Accounting Standards No. 157, Fair Value Measurements (SFAS 157), establishes a common definition for fair value to be applied to accounting principles generally accepted in the United States requiring use of fair value. This standard

establishes a framework for measuring fair value, and expands disclosures about such fair value measurements. SFAS 157 clarifies that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability.

As a basis for considering assumptions, SFAS 157 establishes a three-tier fair value hierarchy which prioritizes the inputs used in measuring fair value. The statement requires that assets and liabilities carried at fair value be classified and disclosed in one of the following three categories:

LEVEL 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access;

LEVEL 2 – Inputs, other than quoted prices in active markets for similar assets or liabilities, that are observable either directly or indirectly; and

LEVEL 3 – Unobservable inputs in which there is little or no market data, requiring the reporting entity to develop its own assumptions (i.e., separate accounts tailored and managed by a portfolio manager).

USAC adopted SFAS 157 as of January 1, 2008, for financial assets and liabilities. USAC utilizes the best information available in measuring fair value and financial assets and liabilities are classified based on the lowest level of input that is significant to the fair value measurement.

The following table summarizes the valuation of the investments according to the SFAS 157 classifications:

<i>(in thousands)</i>		US TREASURIES
	TOTAL	\$ 5,524,643
ACTIVE MARKET FOR IDENTICAL ASSETS	(LEVEL 1)	\$ 5,524,643
OBSERVABLE INPUTS	(LEVEL 2)	\$ –
OBSERVABLE INPUTS	(LEVEL 3)	\$ –

7. INCOME TAXES

USAC is a not-for-profit organization subject to income taxes related to permanent and temporary differences such as meals and

entertainment expense and financial accounting versus tax depreciation. Income taxes for 2008 and 2007 are not material and are included as a component of administrative costs.

8. COMMITMENTS AND CONTINGENCIES

COMMITMENTS TO SCHOOLS, LIBRARIES, AND RURAL HEALTH CARE FACILITIES

The management of USAC has developed operational procedures to administer the application process through which eligible schools and libraries and rural health care providers apply for benefits under the Schools and Libraries and Rural Health Care Programs, respectively. These operational procedures enable USAC to review and process applications resulting in funding commitment letters that are issued to eligible schools and libraries and rural health care providers. USAC, as the administrator of the USF, also receives funds returned by service providers and beneficiaries and applies those funds to reduce the disbursements to schools, libraries, and rural health care providers.

FIXED CONTRACT COMMITMENTS

LaSalle Bank Agreement—On May 1, 2001, USAC entered into an agreement with LaSalle Bank N.A. (“LaSalle”) (the “LaSalle Agreement”). The LaSalle Agreement contract period runs from July 1 through June 30 of the following year. The initial LaSalle Agreement five-year contract ended June 30, 2006. On December 28, 2005, USAC notified LaSalle that it would exercise the first of three one-year renewal options under the LaSalle Agreement, which extended the expiration of the LaSalle Agreement from July 1, 2006 to June 30, 2007. In early 2007, USAC notified LaSalle that it would exercise the second one-year renewal and on September 8, 2007, signed an amendment to the contract extending the expiration to June 30, 2008. In early 2008, USAC notified LaSalle that it would exercise the third one-year renewal and on May 9, 2008, signed an amendment to the contract extending the expiration to June 30, 2009. Under the terms of the LaSalle Agreement, LaSalle provides banking and investment management services for a fixed annual contractual amount that may be satisfied by fees derived by LaSalle from the investment of a portion of the custodial assets. Bank of America acquired LaSalle Bank effective October 17, 2008.

Solix, Inc. Agreement—On May 1, 2000, USAC entered into an agreement with NECA (“Agreement”). The Agreement was a three-year contract, which ran from July 1, 2000 to June 30, 2003. On July 1, 2002, the Agreement was amended and extended to June 30, 2005, with renewal options through June 30, 2008. On January 1, 2003, the contract was assigned to NECA Services, Inc. On November 14, 2005, NECA Services, Inc. became Solix, Inc. Effective

March 29, 2005, USAC executed a partial exercise of the contract renewal option by extending the Agreement through December 31, 2006. On April 25, 2006, USAC executed a partial exercise of the contract renewal option by extending the Agreement through December 31, 2007. On December 12, 2007, USAC executed a partial contract extension through June 30, 2009 for the Schools and Libraries and Rural Health Care operational support services. Under the terms of the Agreement, Solix, Inc. provides programmatic support service to the Schools and Libraries and Rural Health Care Programs. The future contractual required payments for the period January 1, 2009 through June 30, 2009, under the Agreement for both the Schools and Libraries and Rural Health Care programs, totals \$10.5 million.

Telcordia Agreement—On September 2, 2003, USAC entered into an agreement with Telcordia Technologies, Inc. (“Telcordia Agreement”). The Telcordia Agreement is a five-year contract with a four-month transition phase, in the event the contract is not renewed or extended, that runs from September 2, 2003 to December 31, 2008, with a renewal option for one year. On September 3, 2008, USAC notified Telcordia of its intention to exercise the one year renewal option. Under the terms of the Telcordia Agreement, Telcordia provides program support services to the High Cost and Low Income Programs. The future contractual required payments per year through December 31, 2009, under the Telcordia Agreement, are as follows (in thousands):

2009	\$ 3,930
------	----------

SAIC Agreement—On January 2, 2008, USAC entered into an agreement with the Science Applications International Corporation (“SAIC Agreement”). The SAIC Agreement is a five-year contract, which runs from January 1, 2008 to December 31, 2012. Under the terms of the agreement, SAIC will provide information technology support services to USAC and upgrade and transition support for hardware, software, and related customer support. The future contractual required payments for the period January 1, 2009 through December 31, 2009, under the SAIC Agreement are \$5.6 million.

Lease Commitments—USAC leases its office space under two operating lease agreements expiring on September 30, 2015. At December 31, 2008, the future minimal rental payments under these leases are as follows (in thousands):

2009	1,631
2010	1,669
2011	1,705
2012	1,733
2013	1,773
Thereafter	3,201
TOTAL	\$ 11,712

Rent expense under operating leases was \$1.8 million and \$1.7 million for the years ended December 31, 2008 and 2007, respectively.

LEGAL DISPUTES—The Company is involved in various legal proceedings and claims incidental to the normal conduct of its business. The Company reports matters herein where the value of a claim asserted by or against the Company exceeds \$450,000 or more for an individual matter, or for matters relating to the same plaintiff or defendant that in the aggregate amount to \$450,000 or more. The Company reports the following matters:

A complaint was filed to recover an allegedly preferential payment to USAC in the amount of \$457,000 by a telecommunications service provider required to contribute to the USF. On December 22, 2002, the court granted summary judgment in USAC’s favor. Plaintiff appealed the judgment, and, in an order filed September 12, 2003, the United States Bankruptcy Appellate Panel (BAP) for the Ninth Circuit reversed the lower court decision. USAC appealed this decision to the United States Court of Appeals for the Ninth Circuit. On September 20, 2006, the Ninth Circuit court affirmed the BAP and remanded the case to the Bankruptcy Court for discovery and trial. USAC and the plaintiff entered into an agreement settling this dispute on May 5, 2008 and the matter is now closed.

A preferential payment suit was filed by a Chapter 11 liquidating trustee in April 2004 in the United States Bankruptcy Court for the Southern District of New York. The trustee sought to avoid and recover from USAC alleged preferential pre-petition payments totaling \$11.3 million. USAC and the plaintiff entered into an agreement settling this dispute on August 28, 2008 and the matter is now closed. As part of the settlement, USAC made a payment to the trustee in an amount substantially less than the threshold set forth above.

A former employee filed a suit against the Company on May 31, 2007 alleging termination of employment and other discrimination on the basis of race and ancestry in violation of the Civil Rights Act of 1866. The former employee is seeking reinstatement and damages in an

unspecified amount. The court denied USAC's motion to dismiss the complaint. The parties are now engaged in discovery. At the present time, USAC is unable to estimate whether an unfavorable outcome is likely or the amount or range of potential loss.

On June 1, 2007, a contributor to the USF filed a Chapter 11 bankruptcy petition. As of July 31, 2007, USAC's post-petition administrative charges against the contributor were \$2.8 million. Shortly after its bankruptcy filing, the contributor informed USAC that it intended to submit revised revenue information that will substantially reduce USAC's administrative claims. Subsequently, the contributor filed revised forms that reduced its post-petition administrative charges to an amount below the \$450,000 threshold set forth above.

A complaint was filed by a telecommunications carrier alleging USAC failed to pay High Cost Support Mechanism benefits in the amount of \$900,000 to the company following the acquisition of certain exchanges by the company from another carrier. On October 15, 2007, the court stayed the action indefinitely on the grounds that the FCC has primary jurisdiction to decide the issues raised in the complaint. The FCC has not issued a decision concerning this matter as of yet. At the present time, USAC is unable to estimate whether an unfavorable outcome is likely or the amount or range of potential loss.

A complaint was filed on December 28, 2007 by a Schools and Libraries Support Mechanism provider in Texas alleging that USAC failed to make payments on approved funding requests for a support mechanism applicant. The plaintiff seeks to recover liquidated damages of approximately \$778,000 plus exemplary damages of three times this amount. On September 22, 2008, the United States District Court for the Southern District of Texas dismissed the plaintiff's claim with prejudice. The plaintiff appealed the district court's decision to the United States Court of Appeals for the Fifth Circuit. The parties are in the process of preparing and submitting briefs to the court. At the present time, USAC is unable to estimate whether an unfavorable outcome is likely or the amount or range of potential loss.

A complaint was filed on January 2, 2008 by a Schools and Libraries Support Mechanism provider in Kentucky alleging that USAC interfered with the provider's contractual relationships with three separate school districts. The plaintiff has not specified the amount of damages it is seeking to recover. On June 6, 2008, the United States District Court for the Southern District of Kentucky dismissed

the plaintiff's complaint. The plaintiff is also pursuing this matter through the administrative appeals process at the Federal Communications Commission. At the present time, USAC is unable to estimate whether an unfavorable outcome is likely or the amount or range of potential loss.

The Company is vigorously defending the matters described above. Although it is impossible to predict the outcome of these or any of the other outstanding legal proceedings involving the Company, the Company believes that such outstanding legal proceedings and claims, individually and in the aggregate, are not likely to have a material effect on its financial position or results of operations.

9. RETIREMENT PLANS

USAC has a 401(k) Retirement Savings Plan covering all USAC regular employees. The plan is both contributory and noncontributory and all contributions are subject to certain limitations as prescribed by the plan document and government regulations. Employees are immediately vested in the employer contribution, which is funded on a current basis. Employer contributions charged to operations were \$1.6 million and \$1.4 million during 2008 and 2007, respectively.

10. SUBSEQUENT EVENTS

Solix Agreement – On December 12, 2007, USAC executed a partial contract extension through June 30, 2009 for the Schools and Libraries and Rural Health Care operational support services. In February 2009, USAC signed a modification of the current partial contract extension with NECA. On June 9, 2009, USAC signed a modification of the contract extension with NECA. Under the modified agreement, Solix, Inc. provides programmatic support service and operational support transition assistance for the Schools and Libraries and Rural Health Care Programs. The future contractual required payments for the period July 1, 2009 through June 30, 2010, under the modified agreement are \$43,187,355. USAC has the option to extend the contract up to one additional year or until June 30, 2011.

Bank of America Agreement – On June 22, 2009, USAC entered into a four year agreement with Bank of America for banking services. Bank of America will provide banking and investment management services for a fixed annual contractual amount that may be satisfied by funds derived by Bank of America from investment of balances maintained in demand deposit accounts.

REPORT OF INDEPENDENT AUDITORS ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

To the Board of Directors of Universal Service Administrative Company:

We have audited the financial statements of Universal Service Administrative Company (the “Company”) as of and for the year ended December 31, 2008, and have issued our report thereon dated June 15, 2009. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

INTERNAL CONTROL OVER FINANCIAL REPORTING

In planning and performing our audit, we considered the Company’s internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the Company’s internal control over financial reporting.

Our consideration of internal control over financial reporting was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in internal control over financial reporting that might be significant deficiencies or material weaknesses. However, as discussed below, we identified certain deficiencies in internal control over financial reporting that we consider to be a significant deficiency and a material weakness.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity’s ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted

accounting principles such that there is more than a remote likelihood that a misstatement of the entity’s financial statements that is more than inconsequential will not be prevented or detected by the entity’s internal control.

We consider the deficiencies described below to be significant deficiencies in internal controls over financial reporting.

OBSERVATION 1

During the audit we noted approximately \$1.1 million of expenditures relating to fiscal year 2008 for which the Company was not invoiced until after year end. Management did not record the expense and accrued liability for these services in 2008. The current year end process requires management to survey individual program managers requesting their estimate of 2008 services they expect to be billed for subsequent to year end. The Finance Department records liabilities based on the program managers’ responses. It was noted that although management followed their process, they failed to record the expense and associated liability for the amount above.

In 2008 there were changing job responsibilities within the Finance Department. As a result there appeared to be a lack of clarity over which invoices had been accrued.

RECOMMENDATION

We recommend the Company enhance its year-end closing procedures to ensure that all expenditures are recorded in the appropriate accounting period and that estimates provided to the Finance Department for services provided that will be billed for subsequent to year end are reasonable. The Company should consider the following:

1. Obtain supporting evidence for all estimates provided to the Finance Department and assess the reasonableness of those estimates.
2. Develop a formalized procedure to assess completeness of the accrued liabilities.

OBSERVATION 2

During the audit we noted approximately \$730 thousand for the last pay period of 2008 was not accrued at December 31, 2008. The accrual was appropriately recorded in December 2008 but then reversed before the end of the fiscal year resulting in the under accrual. In addition, the accrued vacation liability had not been updated for unused vacation days as of the end of the fiscal year. As a result, the accrued vacation liability was over accrued by \$149 thousand.

These issues appear to be the result of the changing job responsibilities within the Finance Department during fiscal year 2008, as well as a lack of compliance with existing procedures to review account balances for reasonableness. As a result, accrued wages were understated and accrued vacation was overstated.

RECOMMENDATION

We recommend the Company follow its month end and year-end closing procedures and ensure that standard recurring entries are recorded and reviewed. The Company should consider the following:

3. Enhancing existing procedures to include a more detailed review to ensure all standard recurring entries are being recorded and updated.

OBSERVATION 3

During the audit we noted instances where monthly reconciliations of key balance sheet accounts were reviewed and approved with material variances noted between the general ledger and the sub-ledger. The balance sheet accounts were as follows:

USAC CASH – Variance of \$116 thousand identified in December reconciliation. No audit adjustment was recorded as the variance was only on the reconciliation.

USF ACCOUNTS RECEIVABLE – Credit balance of \$244 thousand was identified in December Payment Plan receivable sub-ledger, variance of \$351 thousand was identified between general ledger and sub-ledger. Audit adjustments were recorded to correct.

USAC FIXED ASSETS – Variance of \$6.7 million identified in September reconciliation. No audit adjustment was needed to be recorded as the variance was only on the reconciliation.

USAC ACCOUNTS PAYABLE – Debit balance of \$490 thousand identified in December reconciliation. Audit adjustment was recorded to correct.

No explanations were evident explaining the material variances. In addition, several general ledger accounts were identified at year end with incorrect ending debit or credit balance classification. As a result, various audit adjustments were identified to reclassify accounts.

Failure to perform a robust review of all balance sheet and income statement accounts can result in undetected errors during the closing process, and increases the potential of errors in the financial statements.

RECOMMENDATION

We recommend that management enhance their review of balance sheet and income statement accounts on a monthly basis. This review should include the following:

4. Ensuring all book balances agree to the general ledger and sub-ledger
5. Properly resolve any identified reconciling items on a timely basis and provide sufficient explanations for variances that have been identified
6. Ensuring all components of the reconciliation can be supported and retaining relevant support with the reconciliation
7. Ensuring all significant transactions have been included and are appropriately accounted for.

8. Ensuring all general ledger asset and liability accounts have the appropriate ending debit/credit balance based on the accounts characteristics.
9. Ensuring closing schedule checklist includes all relevant and key steps of the closing process and is finalized after all procedures have been completed and reviewed.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control. We did not identify a control deficiency that could be considered to be a material weakness in internal controls over financial reporting.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses.

COMPLIANCE AND OTHER MATTERS

As part of obtaining reasonable assurance about whether the Company's financial statements are free of material misstatement,

we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Management's response to our observations follows this report. We did not audit management's response and accordingly, we express no assurance on this report.

We noted certain other matters that we reported to management of the Company in a separate letter.

This report is intended solely for the information and use of the Company's Audit Committee, management, and the Office of Inspector General of the Federal Communications Commission, and is not intended to be and should not be used by anyone other than these specified parties.

June 15, 2009

August 27, 2009

Board of Directors
Universal Service Administrative Company
Attn: Dr. Brian L. Talbott
2000 L Street, NW • Suite 200
Washington, DC 20036

Dear Dr. Talbott:

The FY 2008 Independent Auditor's Reports on Internal Control over Financial Reporting reported significant deficiencies in the internal controls over the financial statement process. USAC Management response is included below.

SIGNIFICANT DEFICIENCIES

1) ENHANCE POLICIES AND PROCEDURES OVER COMPLETENESS OF ACCRUED LIABILITIES

USAC Management Response

Management concurs with the finding. In 2009, USAC has made substantial progress in addressing the year-end unrecorded liability process. For example, to ensure that year-end estimates of expenditures are reasonable and recorded in the appropriate accounting period, we have established a comprehensive policy and procedure for reporting accrued liabilities that includes vendor confirmation of unbilled services and when the services were performed. Supporting documentation received from the vendors will be tested for reasonableness by examining contract terms and prior period expenses. In the event vendors do not provide confirmation of unbilled services, a calculated estimate of the accrual will be determined based on the contract period and remaining contract cost. To further reinforce and improve the financial reporting process, USAC procedures will require a quarterly estimate of accrued liabilities.

2) ENHANCE REVIEW OF STANDARD RECURRING ENTRIES

USAC Management Response

We agree with the auditors' comments and, in accordance with the auditor's recommendations, management has implemented appropriate corrective action to provide for a more stringent review process to ensure the accuracy and validity of the entries and balances. To prevent errors and irregularities from occurring, USAC has enhanced its monthly reconciliation and management

review process. For example, on a weekly basis Finance prepares a journal entry transaction detail report to scrutinize account balances and confirm the accuracy of transactions. If errors or irregularities do occur, they will be detected in a timely manner and quickly resolved. USAC procedures will require a signature as authorization and evidence of management review.

3) ENHANCE SUPERVISORY REVIEW PROCEDURES

USAC Management Response

We agree with the auditors' comments, and the following action either has been or will be taken to address the situation identified. USAC has set into practice management directive for consistent application of month-end close procedures that require monthly reconciliation and review of key balance sheet accounts, including cash, accounts receivable, fixed assets, and accounts payable. This includes a review of the appropriate ending balance based on the accounts characteristics. Management will require signatures and dates by the preparer and reviewer on reconciliations worksheets and the month-end close schedule as evidence of that reconciliation were performed and provided explanations for identified variances. Management will resolve identified variances in a timely manner. As a final control step in the month-end close process, management prepares and reviews preliminary trial balance and financial statements to determine the reasonableness and proper classification of key balance sheet and expense line item balances. This review includes a check for recurring significant transactions and accruals. Management will notify all employees to comply with established policies and procedures.

We are committed to continually strengthening USAC's internal controls over financial reporting and processes. We look forward to working in FY2009 to resolve any FY2008 audit findings and to further improve the completeness, timeliness, and accuracy of USAC's financial information.

Sincerely,

A handwritten signature in black ink, appearing to read "W.B. Erwin", is written over a light blue circular stamp.

W.B. Erwin, *Vice President of Finance*

UNIVERSAL SERVICE FUND PROGRAM STATISTICS – 2009

The following pages contain data from the four USF programs administered by USAC. To better understand the data, please note the difference between disbursements and commitments as well as program/funding year versus calendar year.

FUNDING YEAR

For the Rural Health Care and Schools and Libraries programs, a Funding Year (FY) runs from July 1 to June 30 of the following year.

CALENDAR YEAR

The High Cost and Low Income programs disburse funds on a Calendar Year basis. Data in these tables are for Calendar Year 2009.

DISBURSEMENTS

The tables contain the amount of USF support issued in Calendar Year 2009. For the Rural Health Care and Schools and Libraries programs, the disbursement data is also shown by Funding Year in addition to the total 2009 amount disbursed. For the Rural Health Care and Schools and Libraries Programs, disbursement data in the Calendar Year tables may represent multiple Funding Years.

FUNDING COMMITMENTS

Funding commitments are not disbursements. Funding commitments are issued by the Rural Health Care and Schools and Libraries Programs via commitment letters that approve what will be funded through USF support for a particular Funding Year.

Commitments made in Calendar Year 2009 may be for applications filed during previous Funding Years and the current Funding Year.

The tables for the Rural Health Care and Schools and Libraries Programs provide Calendar Year 2009 commitment data and Funding Year 2009 commitment data for program applicants.

RURAL HEALTH CARE AND SCHOOLS AND LIBRARIES

PROGRAM FUNDING YEARS	START DATE	END DATE
Funding Year 2007 (FY2007)	July 1, 2007	June 30, 2008
Funding Year 2008 (FY2008)	July 1, 2008	June 30, 2009
Funding Year 2009 (FY2009)	July 1, 2009	June 30, 2010

USAC's BOARD OF DIRECTORS 2009

Members of the USAC Board of Directors are selected by the Chairman of the FCC from nominations made by constituent groups who are USF stakeholders. Board members represent the telecommunications and information services industry, state telecommunications regulators, consumer advocates, low-income consumers, rural health care providers, schools, and libraries. The USAC Board of Directors has six standing committees: Audit Committee, Executive Committee, Executive Compensation Committee, High Cost and Low Income Committee, Rural Health Care Committee, and Schools and Libraries Committee.

The Universal Service Administrative Company (USAC) is an independent, not-for-profit corporation designated as the administrator of the federal Universal Service Fund by the Federal Communications Commission (FCC). USAC administers Universal Service Fund programs for high cost companies serving rural areas, low-income consumers, rural health care providers, and schools and libraries. The Universal Service Fund helps provide communities across the country with affordable telecommunications services.
