

Shelby County Schools comment on proposed changes to web hosting.

Gaggle provides us with a safe, monitored system for students and teachers to communicate and store school related files. The collaboration tools they provides are invaluable for our students and teachers. It is my understanding that the FCC is proposing a change to the E-rate's Eligible Services list that could cause Gaggle to be ineligible. If this is the case, we could no longer afford to provide this valuable service to our schools. Gaggle's collaboration tools should fall under the email category and potentially under web hosting as well.
